Roles and Responsibilities

Manager Creative Services
Synchrony International Services Pvt. Ltd. [October 2021 – current (1+ year)]
As member of Synchrony' Creative Services team.
- I would **manage the creative mailer portfolio of the Synchrony's Clients** which would include but not limited to RoomsToGo, SleepNumber, Conn's, Reeds, Grand Home Furnishing and many more.
- The role would require me to **give creative advise, create and deploy their mailers**.
- The process would include **initial creative consultation** on the creative assets like banners and text, **mocking up the mailers in Adobe Xd** to get legal approval, **creating the HTML** version of the mailer and **providing support** till the email is launched.

Software Engineer 2
Dell international Inc [10th Feb 2020 to till 21st October 2021(1year 8months)]
Dell international Inc is a Hardware company making and selling computer and servers. Apart from selling in showrooms quite a proportion of their business comes from their own e-commerce website Dell.com. They conduct regular user testing on their website to boost sales and better their user experience.
- As a member of Dell's, A/B testing team I did UI changes as per the A/B test cases on the Dell web sites.
- I created and maintained **A/B test UI code** launched on their 40+ Dell websites.
- These codes are written in **HTML, CSS, Vanilla JavaScript, jQuery.**
- Was a part of 12-member team consisting of international developers from Brazil, USA and India.
- Participated In dashboard revamp project written in **Angular**.
- Participated in Node API project using the framework of **NodeJS and Express JS.**

Web Designer
IMImobile PLC Now part of WEBEX [May 2014 to 5th Feb 2020(5year 9months)]
IMImobile PLC was taken over by WEBEX in 2020. IMImobile was software product and services company which had many recurring clients and had a set of products which was deployed as SASS and PASS services for variety of clients.
- As a design team representative in IMImobile PLC was involved in service level projects from scratch [requirement mapping] to delivery [production movement].
- My duties included by was not limited **creating wireframes** using tools like Figma\Adobe XD.
- **Creating mock-ups** of the wireframes using tools like **Adobe Photoshop** and vector tools like Adobe InDesign.
- Creating working models with technologies like **HTML**, **CSS**, **JavaScript** from the mock-ups.
- Linking the front end with the back end using **REST APIs**.
- Keeping a check on the **usability of the software product** and quality of the code throughout the development till the product deployment in the production.
- Providing **production support** for bugs in production due to environment changes and additional integration.

Engineer
Alcatel-Lucent India Pvt. Ltd Now part of NOKIA [Jan 2012 to Mar 2014(2year 3months)]
The Alcatel – Lucent India Pvt. Ltd was subsidiary of global Alcatel – Lucent which was part of AT&T. It was later taken over by NOKIA. It is a telecommunications company which makes hardware and software for the BTS[Base Transmission Systems]. I joined the company as a contract Test Engineer employed by company "Addeco Flexione work Force Pvt. Ltd." Working for Alcatel – Lucent India Pvt. Ltd. Later contract changed to "S2 Infotech Pvt. Ltd." While still working for Alcatel – Lucent India Pvt. Ltd.
- As an individual contractor did functional and sanity testing on apps written to monitor 2G, 3G, 4G transmission cards.
- Worked with a team of 5 and written multiple unit tests.
